Profile

Experienced full stack developer with 3 years in JavaScript, adept at crafting seamless applications. Proficient in SaaS solutions, committed to impactful and user-centric development.

Education

2022 – Present **Higher Institute of Computer Science**

Professional Master in Software Engineering - open source

2019 – 2022 **Higher Institute for Technological Studies**

National License in Information Technology

Professional experience

2021 – Present **Full Stack developer at CALX Consulting**

I excelled as a Full Stack Developer, seamlessly merging front-end finesse using frameworks with back-end strength in server-side scripting, database management, and API integration. Agile-driven, delivered quality code on time, optimizing performance and

2021 – (6 Month) **Intership at PlanetConectUs**

As a trainee full stack developer, I delved into diverse aspects of web development. I contributed to front-end and back-end tasks, gaining hands-on experience in JavaScript, HTML, CSS and

2021 – (3 Month) **Internship at Gofield**

This experience allowed me to become adept in diverse web technologies. Working closely with a team, I familiarized myself with agile practices, fostering my growth as a versatile and capable full stack developer.
